COLLABORATE Pro is a series of low-cost room appliances, with or without audio endpoints and PTZ cameras, containing a flexible mix of built-in solution tools for any type of group-room collaboration, including: traditional video conferencing, audio conferencing, cloud video & web conferencing, recording and streaming, and wireless presentation.

These powerful tools provide a variety of applications for any group activity: team collaboration, meeting, lecture, presentation, training, corporate communication, product launch, and more...

Traditional Video Conferencing

+ Full HD 1080p SIP/H.323 video conferencing with up to 9-way MCU

+ Data share at 1080p from PC, via wireless or HDMI

+ Record video conferences with data

+ Stream video conferences with data

Cloud Video and Web Conferencing

+ 25 participants can join meetings via PC, Mobile devices, room endpoints or by phone call

+ User experience optimized for group collaboration in a room environment.

+ Interactive whiteboarding and annotation with participants located at any part of the world

+ Simultaneous processing of up to 4 video inputs (e.g. camera)

Multi-user Wireless Presentation

+ Wireless presentations from your device at 1080p—in-room or during call

+ Up to 6 presenters sharing at the same time

+ Digital whiteboard and annotation with people in the same room or anywhere in the world
  - *Available soon*

+ Record presentations and collaboration sessions

Audio Conferencing

+ Pro audio includes the Beamforming Mic Array and CONVERGE® Pro 840T mixer with built-in telephone interface. The combination provides unmatched sound, replacing 10 traditional microphones with twice the pickup range.*

+ UC audio includes the popular CHAT® 150C speakerphone and CHATAttach® Mic Array for huddle and medium-size rooms.

Beamforming Mic and CONVERGE Pro only for COLLABORATE Pro 900

Capture for on-demand Distribution

+ Capture all voice, video and data content

+ Record presentations, meetings, conferences, lectures, trainings, and more

+ Local or external storage

Video Streaming for Live Distribution

+ Capture all voice, video and data content

+ Stream presentations, meetings, conferences, lectures, trainings, and more on-demand or live to large audiences

+ Stream via unicast or multicast

ClearOne.
